The screenshot shows the Power BI interface in the Grid view. The main area displays a table with the following data:

11	Row ID	Row ID	Order ID	Order Date	Ship Date	Ship Mode
	1	3229	4891	31-07-2012	31-07-2012	Same Day
	2	2634	378	05-02-2013	07-02-2013	Second Class
	3	2533	249	17-10-2013	18-10-2013	First Class
	4	1352	79342	28-01-2013	30-01-2013	First Class
	5	4722	20	05-11-2013	06-11-2013	Same Day
	6	2273	360	28-06-2013	01-07-2013	Second Class
	7	3057	326	07-11-2011	09-11-2011	First Class
	8	31192	IN-2012-86369	14-04-2012	18-04-2012	Standard Class
	9	40155	CA-2014-135909	14-10-2014	21-10-2014	Standard Class

A context menu is open over the 'Row ID' column, showing options: Filter..., Create calculation..., Create data group..., Create navigation path..., Hide from users, Remove, Format data..., Clean..., Sort descending, Sort ascending, and Properties. The left pane shows a different set of fields in the 'Data module'.

The screenshot shows a data table with columns: Row ID, Order ID, Ship Date, Ship Mode, and Customer ID. A context menu is open over the 'Order ID' column, showing options like 'Filter...', 'Create data group...', 'Create navigation path...', 'Split...', 'Hide from users', 'Remove', 'Format data...', 'Clean...', 'Sort descending', 'Sort ascending', and 'Properties'.

Row ID	Order ID	Ship Date	Ship Mode	Customer ID
1	32298	2012-07-31	Same Day	RH-19495

## Understanding the dataset

Team ID	PNT2022TMID25228
---------	------------------

### CONTEXT

The retail network has several subsidiaries that are dispersed throughout numerous geographic regions. In this study, we analyze the sales datasets to determine the variables influencing the sales. Due to the COVID epidemic, it is difficult to enter a store at random and make a purchase. To get over this, attempt to comprehend a few things, such as the Global Super Store's customer and product analyses.

### DATASETS

A dataset is a group of data that has been organized in some way. Any type of data, including series, arrays, and database tables, can be found in a dataset. A dataset is a group of data that has been organized in some way. Any type of data, including series, arrays, and database tables, can be found in a dataset. A structure for managing your submitted data is provided by data sets. The data uploaded to Analytics is included in a Data Set. The joining of submitted data with already-existing data is controlled by data sets.

### CUSTOMER ANALYSIS

Customer analysis is a technique for using customer data to analyze and strategize a company's business plan. Customer analysis is a crucial component of marketing and advertising campaigns' customer acquisition tactics.

- A better comprehension of prospective clients' purchasing habits.
- Identify the customer's needs?
- The regularity of purchases and the time elapsed between them?
- Dividing up profitable consumer categories based on shared characteristics and behavior.
- Group customers according to their purchases?

These kinds of questions can be answered through customer analysis.

### PRODUCT ANALYSIS

The act of acquiring, defining, and analyzing data on a good or service in order to make wiser decisions is known as product analysis. Asking questions about a product and coming up with responses that define its application, qualities, and other important features are often included in this process. It works well for projects where the deliverable is a product rather than a service or an outcome. It enables project managers to guarantee that the product scope and project scope are both accurate and clearly understood. In order to translate the objectives and product description provided by the customer or sponsor into concrete deliverables, product analysis is used.

- How effectively your product satisfies consumer demands
- What are the top five products that generate the most revenue each year?
- Does the price reduction have any impact on daily sales?
- Which nation has the most or least amount of sales?

- How do sales impact the cost of the item?

## **CONTENT**

When you download the dataset, you will see rows that detail online orders made by people worldwide between January 1, 2011, and December 31, 2014. None of the other columns are lacking any data, with the exception of the postal code, which you are free to omit if required.
